SBOM Quality Audit

[← Back to Analysis](#)

SBOM quality audit findings including completeness, missing fields, and package deprecation

⚠️ Experimental Feature: This audit page is under active development. SBOM compliance standards (CISA, BSI TR-03183, NTIA, etc.) are rapidly evolving. **Always consult official documentation** for authoritative compliance requirements. This tool provides guidance only and should not be used as the sole basis for compliance decisions.

📄 SBOM Quality Audit: This page shows SBOM quality audit findings including missing versions, missing PURLs, missing licenses, SBOM completeness issues, and deprecated packages. For security findings like GitHub Actions pinnability and dependency confusion, see the [Findings](#) page. For version drift, staleness, and end-of-life status, see the [Deps](#) page.
