Security Findings

Security findings including GitHub Actions pinnability, dependency hijacking risks, EOX issues, and dead source repository detection

Back to Analysis

Security Findings: This page shows security-related findings including GitHub Actions security issues (unpinned actions, mutable tags, floating Docker images), dependency hijacking/confusion risks (packages not found in public registries), EOX (end-of-life/support) packages, and dead source repository detection. All processing happens in your browser for maximum privacy.

HIGH

Dependency Confusion

Potential Dependency Confusion

19 findings

Package not found in public registry. This could indicate a private/internal package that is vulnerable to dependency confusion attacks. Attackers can register a package with the same name on public registries.

About Cyfinoid Research

Leading cybersecurity research company specializing in software supply chain security, Android security, and cloud security. Our expertise spans across comprehensive software supply chain protection.

Privacy-First: All processing happens in your browser

No Server Required: Works entirely client-side

Persistent Storage: Results saved in browser storage

Rate Limit Aware: Handles GitHub API limits intelligently
